Washing the dishes is important.

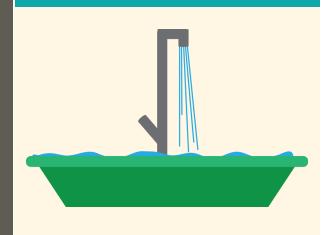

I gather my dirty dishes near the sink.

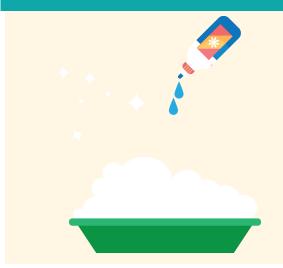

I fill the sink with warm water. I make sure the water does not overflow the sink.

I add dish soap into the water. I add enough so the water has some bubbles but not too many.

I put the dirty dishes into the soapy water. If the water begins to overflow, I need to drain some of it out.

I use a sponge or washcloth to wash the dishes.

I wipe the entire dish, cleaning off all the dirty spots.

When the dish is clean, I rinse it with clean water.

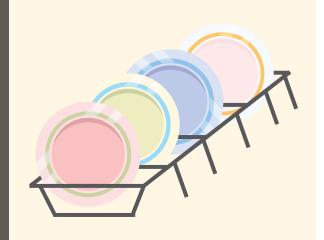

When the soap is off the dish, I place it in a drying rack or dry it with a clean towel.

I do this with each dish.
